TSA Leagues & Scheduling Committee

Ranking Explanations

Terms & Abbreviations

Division Record (DR) – A team's record for its three [3] in-Division meets (or two [2] in-Division meets for teams at the bottom of each League). Teams that win their division will likely move up a division (or more) the following year. Teams that lose their division will likely move down a division (or more).
Head-to-Head Competition (HTH) – The 6 dual meets on each team's schedule for the year. The results of these meets are the secondary driver of the following year's rankings.
Common Opponent Point Differential (COPD) – used to determine the relative strength of 2 teams that did not meet in the past season by comparing their performance against which both teams compete.
Swim-up – a meet in which your opponent is ranked higher than your team.
Swim-down – a meet in which your opponent is ranked lower than your team.
Cross – a meet in which you swim an opponent from the other league. (North vs. South)

Ranking Methodology

The primary factor used to determine the strength of one team compared to another is the result of a team's in-division record, followed by head-to-head (HTH) competition in the most recent swim season. The size of the point differential from the result of that meet may also be given consideration. (i.e. Was the score close or was it a lopsided win?) Common Opponent Point Differential (COPD) is also used as a measure of strength for teams that did not meet during the most recent season or in cases where the head-to-head result was close.

The loss or addition of swimmers due to age-outs, relocations or any other reason is not considered since it's impossible to obtain a comprehensive list of all changes that will occur before the start of the next season and because the impact of any individual swimmer or group of swimmers cannot be readily quantified.

Results from swim seasons prior to the most recent are not considered for multiple reasons. First, these results are, obviously, further outdated. In addition, including the results of 2 or more seasons significantly increases the number of conflicting results, serving to make an already complex process even more difficult. Similarly, the results from various optional meets (TSA Championship; Cary City; etc.) are not considered since not all teams/swimmers participate in these meets.

A team's rank should be based on objective, quantifiable data rather than feelings, opinions or perceptions.

Legend

Rank **Appropriate rank is fairly obvious. There is no conflicting evidence that would suggest a different rank.**

Rank **Some conflicting evidence exists. Rank is based on the strongest evidence.**

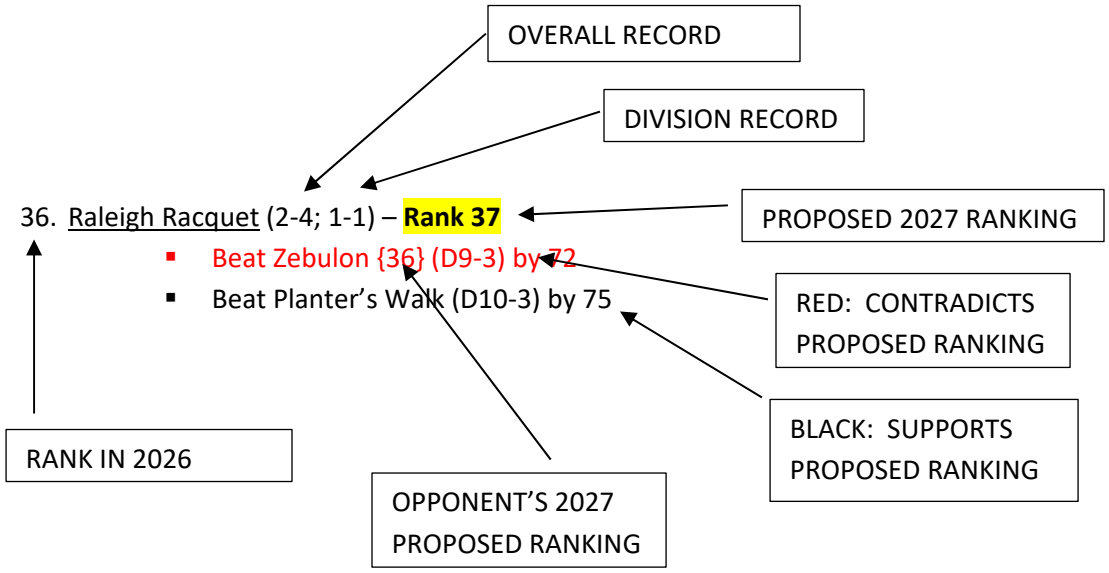

Rank **Significant conflicting evidence exists. A reasonable argument could be made for an alternative rank.**

COPD Common Opponent Point Differential evidence that supports the team's proposed rank.

COPD Common Opponent Point Differential evidence that conflicts with the team's proposed rank

The stronger team is listed first in COPD data; A score that doesn't support the rank is shown in red.
